Information:

Total Files Size (in bytes):	153470
-------------------------------------	--------

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111
 If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371
 If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office
 If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

Amendments to the Claims:

This listing of claims replaces all prior versions and listings of claims in the application:

Listing of Claims

1. (Currently Amended) A computer-implemented method comprising:
 - displaying, to a user, a first web document received from a search engine, the first web document comprising a search engine result set;
 - receiving in a client application in a client device an interest signal generated in response to a user action, the interest signal indicating to the client application that the user has an interest in a hyperlink displayed as part of the search engine result set in the first web document, the hyperlink referencing a second web document;
 - automatically generating in the client application in the client device a request signal in response to the interest signal and sending the request signal to the search engine to request a text extract and implicitly derived past-user information, the text extract comprising text data previously extracted from the second web document and stored separately from the second web document, and the implicitly derived past-user information rating multiple previous viewers' interest in the second web document, the previous viewers being other than the user, and the interest of the previous viewers being implicitly derived using data at the search engine which logs measures of the previous viewers' interaction with the second web document, the measures including the previous viewers' linger time on the second web document, the previous viewers' quantity of repeat visits to the second web document, a quantity of repeat queries initiated by the previous viewers which led to the second web document, or a quantity of click-throughs by the previous viewers on the second web document;
 - receiving the text extract and the implicitly derived past-user information in the client device in response to the request signal; and
 - displaying the text extract and the implicitly derived past-user information to the user in association with the first web document, in response to the interest signal.

Attorney's Docket No.: 16113-1101001 / GP-167-00-
US

2. (Original) The method of claim 1, further comprising logging the interest signal.
3. – 9. (Cancelled)
10. (Previously Presented) The method of claim 1, further comprising:
receiving information indicating a genre of the second web document in response to the request signal; and
displaying the genre to the user.
11. (Previously Presented) The method of claim 1, further comprising:
receiving information indicating a relationship of the first and second web documents in response to the request signal; and
displaying the relationship to the user.
12. (Cancelled)
13. (Cancelled)
14. (Previously Presented) The method of claim 1, further comprising:
receiving information indicating a query that led the previous viewers to the second web document in response to the request signal; and
displaying the query to the user.
15. (Previously Presented) The method of claim 1, further comprising:
receiving information indicating a comparison between content from the first web document and content from the second web document in response to the request signal; and
displaying the comparison to the user.

Applicant : Gregory Joseph Badros et al.

Attorney's Docket No.: 16113-1101001 / GP-167-00-
US

16. (Previously Presented) The method of claim 1, further comprising:
receiving a cached representation of a previously-available second web document in
response to the request signal; and
displaying the cached representation to the user.
17. (Previously Presented) The method of claim 1, wherein the interest signal comprises an
indication of a cursor hovering over the hyperlink.
18. (Previously Presented) The method of claim 1, wherein the interest signal comprises an
indication of a right-click while a cursor is hovering over the hyperlink.
19. (Previously Presented) The method of claim 1, wherein displaying the text extract and
the implicitly derived past-user information to the user in association with the first web
document comprises displaying the text extract and the implicitly derived past-user information
in an overlay over the first web document.
20. (Original) The method of claim 19, wherein the overlay comprises a tooltip.
21. (Previously Presented) The method of claim 1, wherein displaying the text extract and
the implicitly derived past-user information to the user in association with the first web
document comprises displaying the text extract information and the implicitly derived past-user
information in a status bar.
22. (Previously Presented) The method of claim 1, wherein displaying the text extract and
the implicitly derived past-user information to the user in association with the first web
document comprises displaying the text extract and the implicitly derived past-user information
in a right-click menu.
23. (Previously Presented) The method of claim 1, wherein displaying the text extract and
the implicitly derived past-user information to the user in association with the first web

Applicant : Gregory Joseph Badros et al.

US

document comprises displaying the text extract and the implicitly derived past-user information in a pop-up window.

24. (Previously Presented) The method of claim 1, wherein displaying the text extract and the implicitly derived past-user information to the user in association with the first web document comprises displaying the text extract and the implicitly derived past-user information in a persistent window.

25. (Previously Presented) The method of claim 1, wherein displaying the text extract and the implicitly derived past-user information to the user in association with the first web document comprises displaying the text extract and the implicitly derived past-user information with the first web document.

26. (Previously Presented) The method of claim 1, wherein displaying the text extract and the implicitly derived past-user information to the user in association with the first web document comprises audibly outputting the text extract and the implicitly derived past-user information.

27. (Previously Presented) The method of claim 1, wherein displaying the text extract and the implicitly derived past-user information to the user in association with the first web document comprises outputting the text extract and the implicitly derived past-user information through a haptic device.

28. (Previously Presented) The method of claim 1, wherein displaying the text extract and the implicitly derived past-user information to the user in association with the first web document comprises displaying a hyperlink referencing a third web document, the third web document comprising the text extract and the implicitly derived past-user information.

Page : 6 of 12

Attorney's Docket No.: 16113-1101001 / GP-167-00-
US

29. (Currently Amended) A computer-implemented method comprising:
- transmitting a first web document from a search engine to a client application, the first web document comprising a search engine result set;
 - receiving in the search engine from the client application a request signal requesting a text extract and implicitly derived past-user information, the text extract comprising text data previously extracted from a second web document referenced by a hyperlink displayed as part of the search engine result set in the first web document and stored separately from the second web document, the implicitly derived past-user information rating a previous viewers' interest in the second web document, the previous viewers being other than the user, and the request signal being automatically generated based on receiving, in the client application, an interest signal generated in response to a user action, the interest signal indicating to the client application that the user has an interest in the hyperlink;
 - implicitly deriving in the search engine the interest of the previous viewers using data which logs measures of the previous viewers' interaction with the second web document, the measures including the previous viewers' linger time on the second web document, the previous viewers' quantity of repeat visits to the second web document, a quantity of repeat queries initiated by the previous viewers which led to the second web document, or a quantity of click-throughs by the previous viewers on the second web document;
 - retrieving the text extract in the search engine in response to the request signal; and
 - generating in the search engine an information signal comprising the retrieved text extract and the implicitly derived past-user information, the information signal configured to cause the text extract and the implicitly derived past-user information to be output in association with the first web document.

30. (Previously Presented) The method of claim 29, further comprising logging the request.

31. – 37. (Cancelled)

Attorney's Docket No.: 16113-1101001 / GP-167-00-
US

38. (Previously Presented) The method of claim 29, wherein the information signal further comprises information indicating a genre of the second web document.

39. (Previously Presented) The method of claim 29, wherein the information signal comprises information indicating a relationship of the first and second web documents.

40. (Canceled)

41. (Canceled)

42. (Previously Presented) The method of claim 29, wherein the information signal comprises information indicating a query that led the previous viewers to the second web document.

43. (Previously Presented) The method of claim 29, wherein the information signal comprises information indicating a comparison between content from the first web document and content from the second web document.

44. (Previously Presented) The method of claim 29, wherein the information signal comprises a cached representation of a previously-available second web document.

45. (Previously Presented) The method of claim 29, wherein causing the text extract and the implicitly derived past-user information to be output in association with the first web document comprises causing the text extract and the implicitly derived past-user information to be displayed in an overlay.

46. (Original) The method of claim 45, wherein the overlay comprises a tooltip.

47. (Previously Presented) The method of claim 29, wherein causing the text extract and the implicitly derived past-user information to be output in association with the first web document

Applicant : Gregory Joseph Badros et al.
Serial No. : 10/749,440

Attorney's Docket No.: 16113-1101001 / GP-167-00-
US

comprises causing the text extract and the implicitly derived past-user information to be displayed in a status bar.

48. (Previously Presented) The method of claim 29, wherein causing the text extract and the implicitly derived past-user information to be output in association with the first web document comprises causing the text extract and the implicitly derived past-user information to be displayed in a right-click menu.

49. (Previously Presented) The method of claim 29, wherein causing the text extract and the implicitly derived past-user information to be output in association with the first web document comprises causing the text extract and the implicitly derived past-user information to be displayed in a pop-up window.

50. (Previously Presented) The method of claim 29, wherein causing the text extract and the implicitly derived past-user information to be output in association with the first web document comprises causing the text extract and the implicitly derived past-user information to be displayed in a persistent window.

51. (Previously Presented) The method of claim 29, wherein causing the text extract and the implicitly derived past-user information to be output in association with the first web document comprises causing the text extract and the implicitly derived past-user information to be displayed with the first web document.

52. (Previously Presented) The method of claim 29, wherein causing the text extract and the implicitly derived past-user information to be output in association with the first web document comprises causing the text extract and the implicitly derived past-user information to be audibly output.

53. (Previously Presented) The method of claim 29, wherein causing the text extract and the implicitly derived past-user information to be output in association with the first web document

Applicant : Gregory Joseph Badros et al.
Serial No. : 10/749,440
Filed : December 31, 2003
Page : 9 of 12

Attorney's Docket No.: 16113-1101001 / GP-167-00-
US

comprises causing the text extract and the implicitly derived past-user information to be output through a haptic device.

54. (Previously Presented) The method of claim 29, wherein causing the text extract and the implicitly derived past-user information to be output in association with the first web document comprises causing a hyperlink referencing a third web document to be output, the third web document comprising the text extract and the implicitly derived past-user information.

55. – 61. (Cancelled)

62. (Previously Presented) The method of claim 1, wherein the text data is sufficient to approximate usefulness of all content in the second web document.

63. (Previously Presented) The method of claim 29, wherein the text data is sufficient to approximate usefulness of all content in the second web document.

64. – 67. (Cancelled)

68. (Previously Presented) The method of claim 1 further comprising generating the text extract at the search engine based on crawling a web site storing the second web document.

69. (Previously Presented) The method of claim 1, wherein the client application further comprises a browser-enabled JavaScript application.

70. (Cancelled)

71. (Currently Amended) A computer-readable ~~medium~~ storage device encoded with a computer program, the computer program comprising instructions that, when executed, operate to cause a computer to perform operations comprising:

US

displaying, to a user, a first web document received from a search engine, the first web document comprising a search engine result set;

receiving in a client application an interest signal generated in response to a user action, the interest signal indicating to the client application that the user has an interest in a hyperlink displayed as part of the search engine result set in the first web document, the hyperlink referencing a second web document;

automatically generating in the client application a request signal in response to the interest signal and sending the request signal to the search engine to request a text extract and implicitly derived past-user information, the text extract comprising text data previously extracted from the second web document and stored separately from the second web document, and the implicitly derived past-user information rating a previous viewers' interest in the second web document, the previous viewers being other than the user, and the interest of the previous viewers being implicitly derived using data at the search engine which logs measures of the previous viewers' interaction with the second web document, the measures including the previous viewers' linger time on the second web document, the previous viewers' quantity of repeat visits to the second web document, a quantity of repeat queries initiated by the previous viewers which led to the second web document, or a quantity of click-throughs by the previous viewers on the second web document;

receiving the text extract and the implicitly derived past-user information in response to the request signal; and

displaying the text extract and the implicitly derived past-user information to the user in association with the first web document, in response to the interest signal.

72. (Currently Amended) A computer-readable ~~medium~~ storage device encoded with a computer program, the computer program comprising instructions that, when executed, operate to cause a computer to perform operations comprising:

transmitting a first web document to a client application, the first web document comprising a search engine result set;

receiving from the client application a request signal requesting a text extract and implicitly derived past-user information, the text extract comprising text data previously

REMARKS

Further to the Amendment dated October 10, 2008, the Applicants respectfully request that the application be examined in light of the above-noted amendments to the claims.

Interview Summary

The Applicant's undersigned representative thanks Examiner LeRoux for the telephonic interview conducted on November 19, 2008. In the interview, the undersigned again confirmed that the "storage device" of claims 71 and 72 is intended to describe a hardware storage device. In a genuine effort to advance prosecution, claims 1, 29, 71 and 72 are amended herein at the request of the Examiner.

Conclusion

No other matters being raised, and the entire application is fully in condition for allowance, and such action is courteously solicited.

No fees are due. Please apply any charges not otherwise paid, or any credits to deposit account 06-1050.

Respectfully submitted,

Date: November 19, 2008
